

# HELLO, MY FRIEND THANK YOU FOR CHOOSING REDVFX!

This document will guide how to customize the item simply. Please follow the images and process. If you are a very new user of Adobe Premiere Pro 2021, this is the best way to replace and edit text and change the settings of the template as your need.

Go to inside the 06.Premiere Pro Files folder then open the Premiere Pro project file

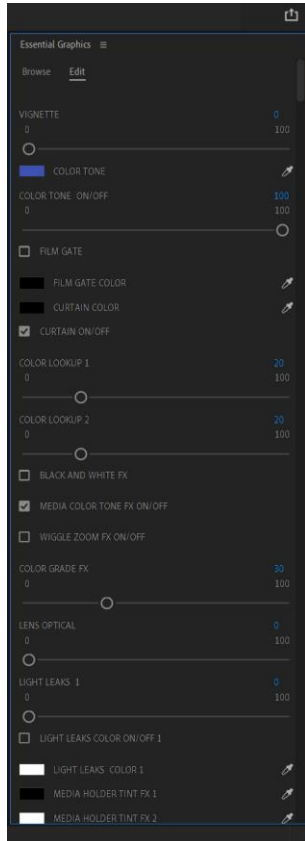

When open with Premiere Pro you can see the interface of the Premiere Pro with the template.

Please follow these steps to change environments effect.

Select the template in the timeline then go to the essential graphics panel in premiere pro then click the 'Edit' section then will appear all the controls.

Select one by one and see the difference when the controller changes with their own parameters. you can change the atmosphere, color and etc as your needs.

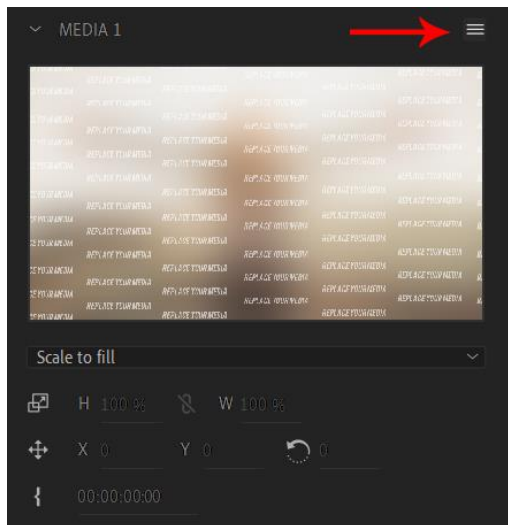

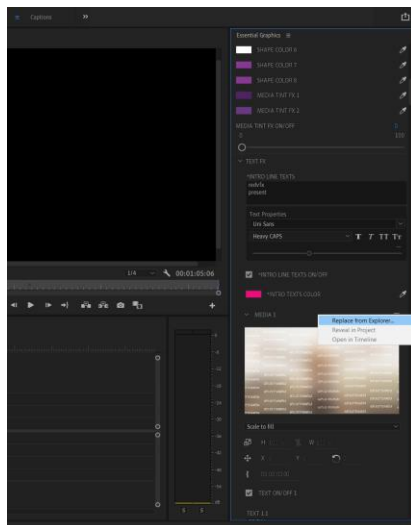

Eg: when you change the value of VIGNETTE then you can see the effect of the VIGNETTE.

COLOR TONE  
FILM GATE  
COLOR LOOKUP  
BG WHITE FX  
MEDIA COLOR TONE FX  
LIGHT LEAKS  
LENS OPTICAL

These are the common effects of your templates and those are will help you to make your output much attractive.

Please follow these steps to replace the media files.

Select the template in the timeline then go to the essential graphics panel in premiere pro then click the 'Edit' section then will appear all the controls and replace the holder in the panel.

Click the right mouse button near the icon. Then you can see the Replace from Explorer..

Then select footage as you want to replace That's it.

You can do the same thing for replacing the logos and icons but keep in mind you should import PNG images only. Sometimes it will support any other alpha version supported images.

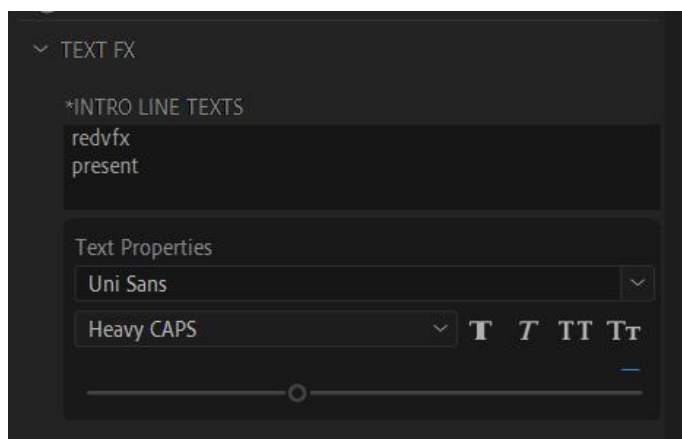

Click the right mouse button near the icon.  
Then you can see the  
Replace from Explorer..

Then select footage as you want to replace  
That's it.

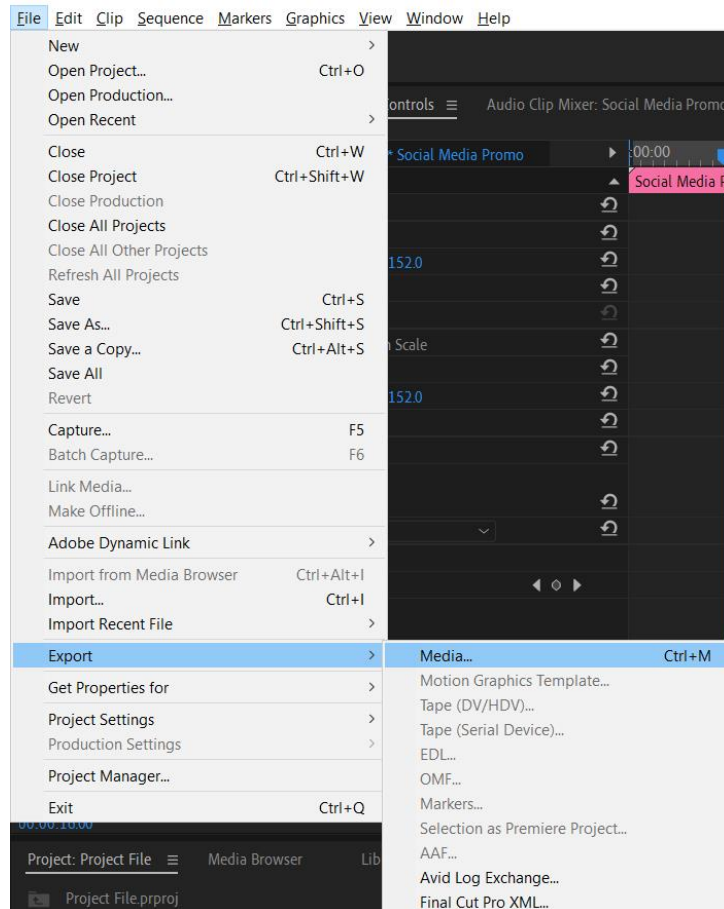

Please follow these steps to edit the Text files.

Select the template in the timeline then go to the essential graphics panel in premiere pro then click the 'Edit' section then will appear all the TEXT replace box in the panel.

You can simply type the text and change the setting of the fonts in this panel. And change the fonts also as you need.

Please follow these steps to EXPORT the files.

Go to \_ File\_Export\_Media.. Ctrl+M

Then you can see the export setting panel, select the file format or Video format as you need, then hit the Export.

Now you done
