GIRL CHARACTER ANIMATION TOOLKIT - PREMIERE PRO TEMPLATE

DEAR CUSTOMER, HERE YOU CAN FIND A FAST AND EASY GUIDE TO CREATE YOUR AMAZING VIDEO/ANIMATION ON IN LESS THAN MINUTES.

Elite Motion Team

- How to Use the JSON Animation File

1 - For Websites:

- Include the Lottie library in your HTML file:

```
<script src="https://cdnjs.cloudflare.com/ajax/libs/bodymovin/5.7.13/lottie.min.js"></script>
```

- Add the animation to your page:

```
<div id="lottie-animation"></div>
```

```
<script>
```

```
  var animation = lottie.loadAnimation({  
    container: document.getElementById('lottie-animation'),  
    renderer: 'svg',  
    loop: true,  
    autoplay: true,  
    path: 'path-to-your-json-file.json'  
  });
```

```
</script>
```

2 - For Mobile Apps :

- Use Lottie iOS, Lottie Android, or React Native libraries.
- Example for iOS:

```
let animationView = AnimationView(name: "your-json-file")  
animationView.play()
```

3 - Control the Animation (Optional):

- You can control the animation using Lottie's API:

```
animation.play(); // Play  
animation.pause(); // Pause  
animation.setSpeed(0.5); // Change speed
```
