

PDF help file

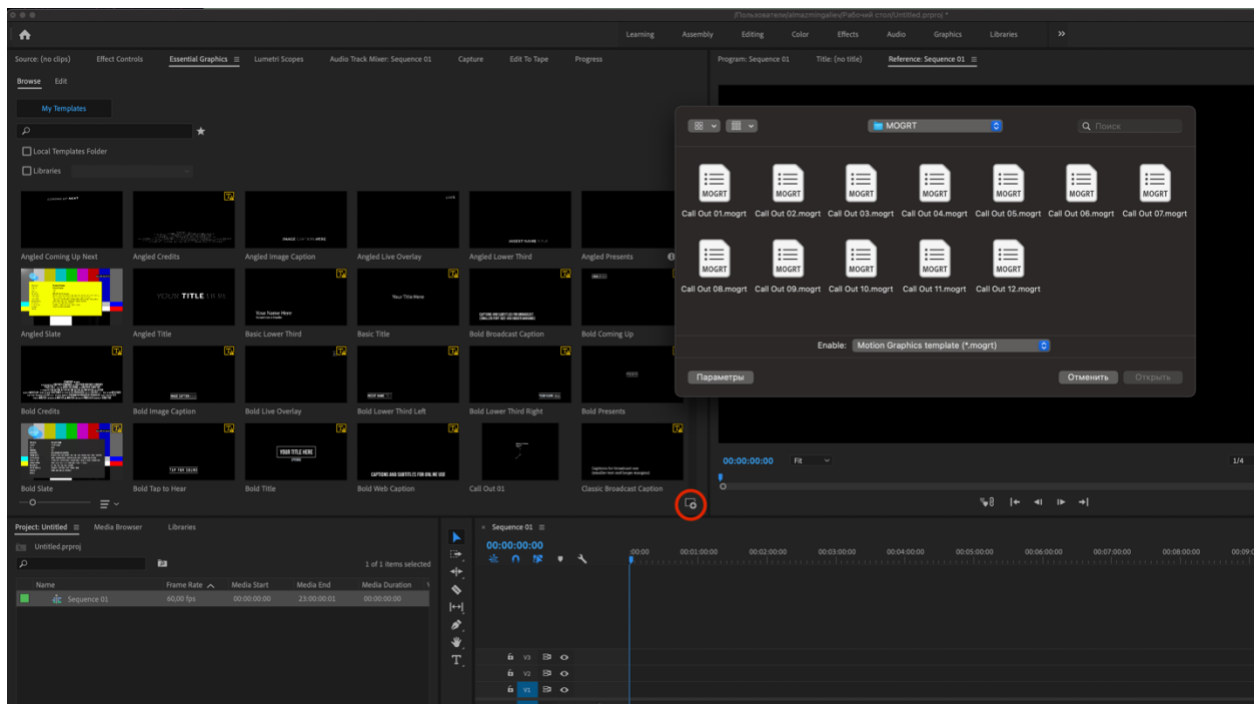

Hi, this is a little lesson for Instagram Stories. To get started, open in Premiere Pro. 01. Open Premiere Pro

02. Create a sequence

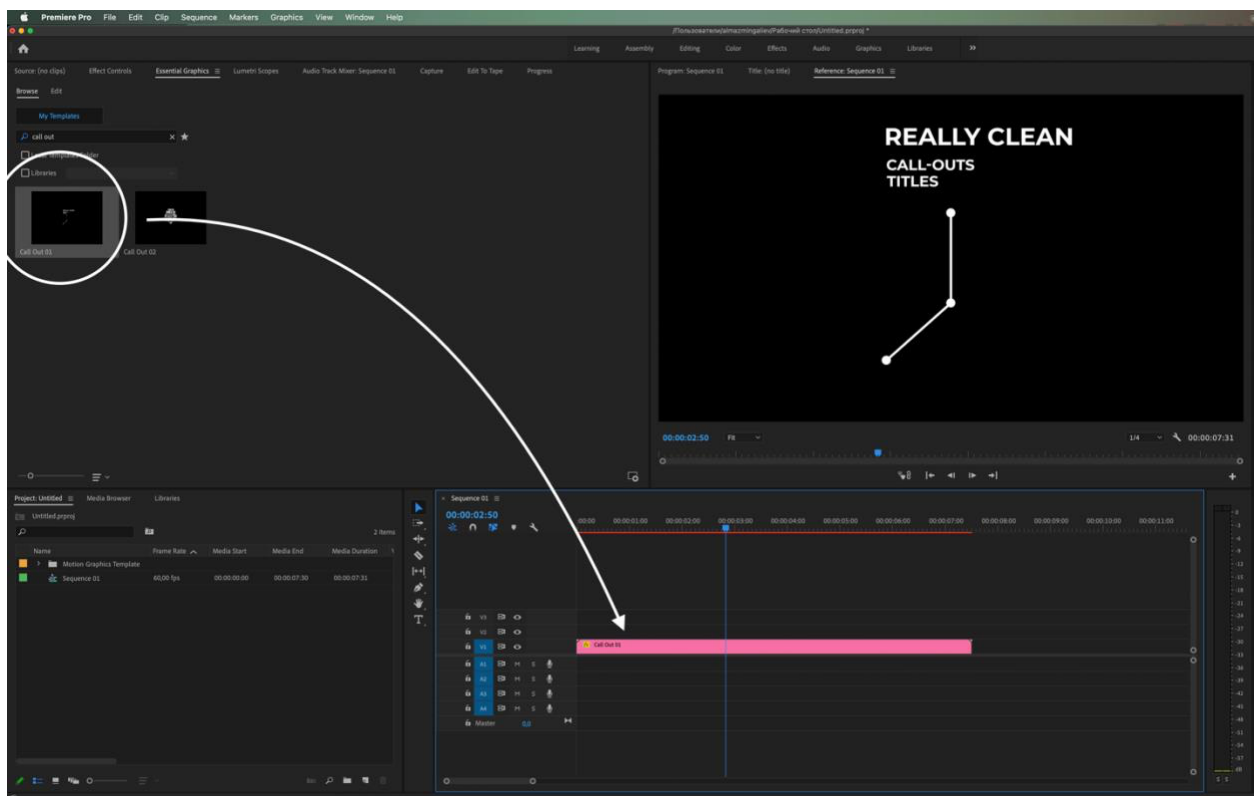

03. Open the Essential Graphics window

04. Add the mogrt you need

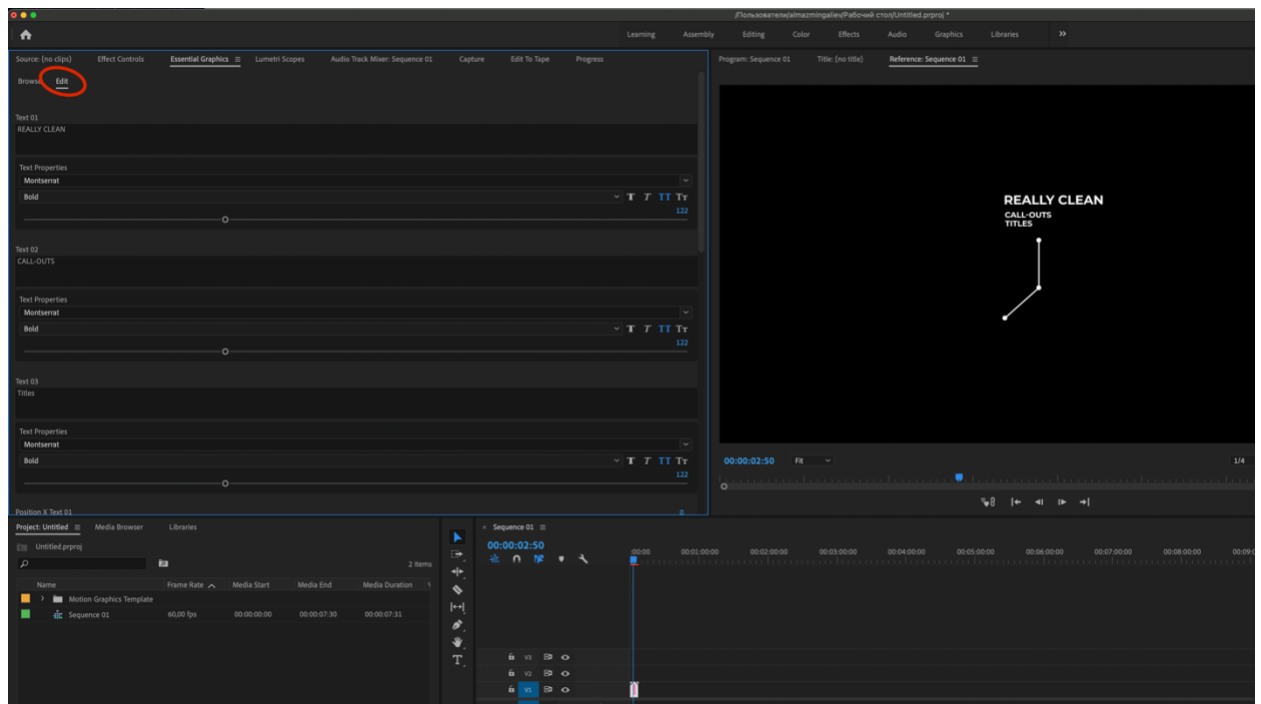

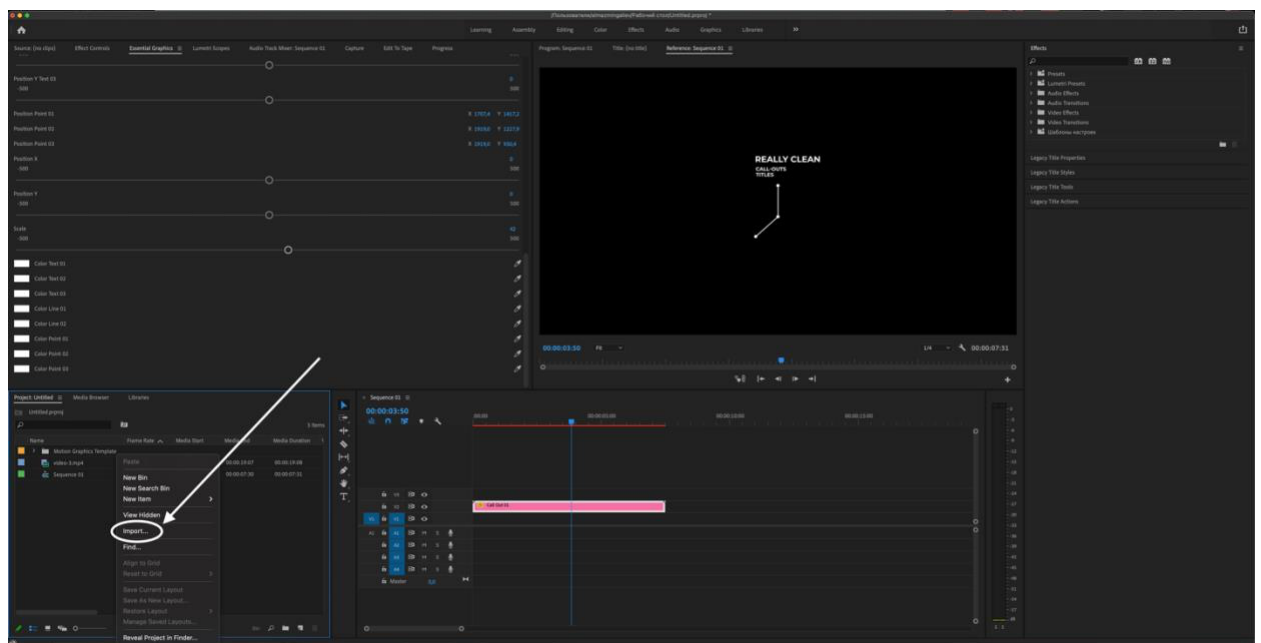

05. Transfer the mogrt to the timeline

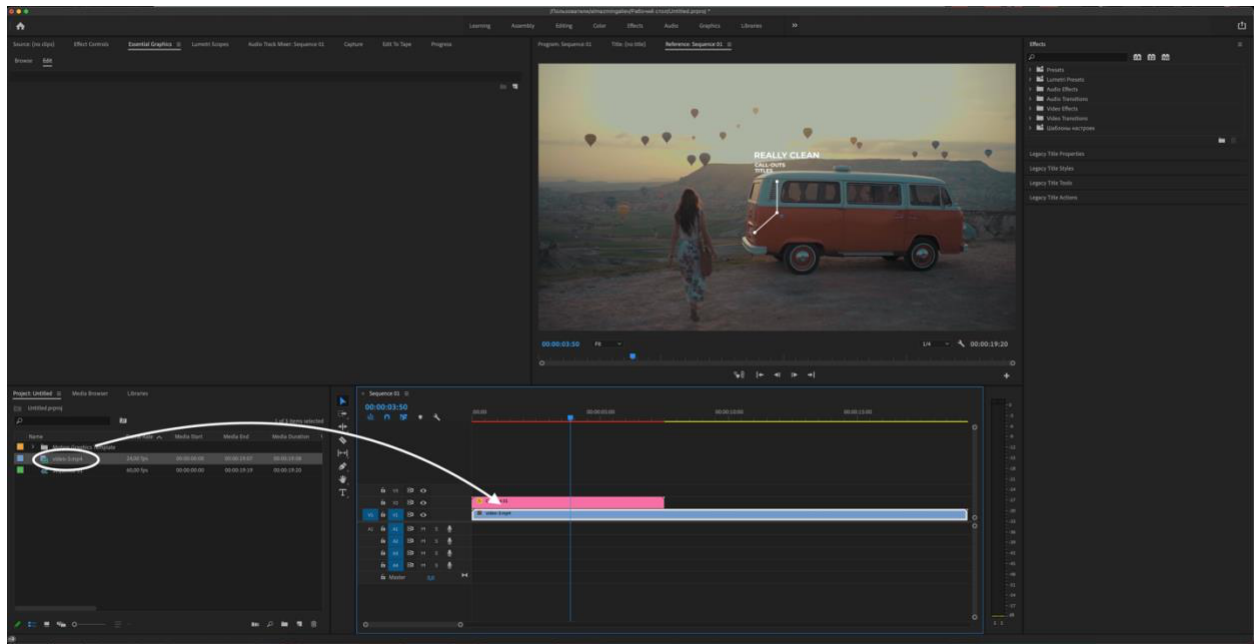

06. Edit as you need

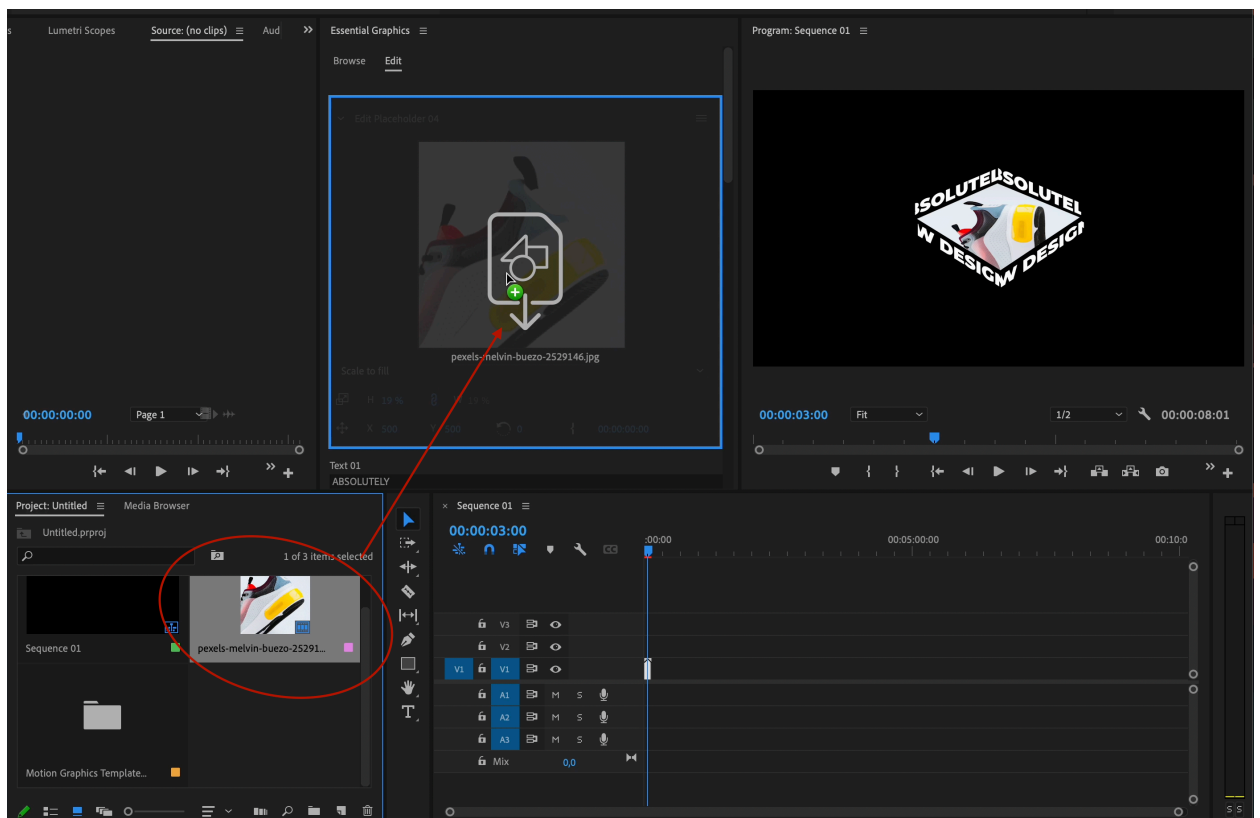

To add a video / image, right click, then select import.

Choose the video / image you need. Move the selected video to the timeline.

To add an image to the title, you just need to drag and drop your image as shown in the picture

Thanks for downloading my project, I hope you enjoy it!
